1. Programm start:

Datei Assistent Extras Web ?

Load 3D models and generate EasyCrystalPoints with the "Assistant"

To generate a 3D point cloud, please use the "Assistant" menu, you must then proceed through the individual submenus from top to bottom. Within a few minutes you will have a first-class point cloud for the internal glass engraving.

3. Rotate the model to the front view

Use the 3 buttons (rotate around the x, y and z axis) until you obtain the required front view. The rotation is dependent on the coordinates system of your 3D program.

Front view:

4. choose crystal size:

C-28
aroben
$50 \times 80 \times 50$
80 x 50 x 50
$50 \times 80 \times 50$
50 x 50 x 50
90 X 60 X 60 60 Y 90 Y 60
60 x 60 x 60
$30 \times 20 \times 15$
20 x 30 x 15
iransparenz

Your 3D model will then be automatically scaled to the required glass size and positioned centrally.

5. Add point cloud:

6. Save point cloud :

7. Save point cloud :
